

Small Business Administration, and emergency first responders for taking swift action and providing our district with supplies, funding, and on-the-spot guidance for victims.

While we still have a tough road ahead, our district can take heart in the fact that every step is being taken to ensure that help will reach everyone affected and in a swift and efficient manner. I hope that all Americans will keep the residents and families of North Carolina and those families in Alabama and the other States that have been so terribly affected in their prayers as we continue to work in the rescue effort going forward.

Thank you. God bless America.

SMALL BUSINESS INNOVATION RESEARCH

The SPEAKER pro tempore. The Chair recognizes the gentleman from Pennsylvania (Mr. ALTMIRE) for 5 minutes.

Mr. ALTMIRE. Mr. Speaker, I rise today in support of the Small Business Innovation Research program. For over a quarter century, SBIR has been key to American competitiveness around the world. It has provided quality research, spurred technological advancements, and allowed innovative small businesses to partner with the government for the development of some of today's most cutting-edge goods and services.

The region I represent in western Pennsylvania is home to a number of companies that have benefited from the SBIR program, yet these companies have been faced with uncertainty over the past few years because Congress has failed to act on a full reauthorization. Short-term extensions are putting the future of research and development at risk. In this fragile economy, Congress owes it to these innovators to give them the certainty they need to fully pursue their ideas.

□ 1030

I have supported legislation to reauthorize this program for the past 4 years because I understand the importance of innovation and the Federal Government's unique role in creating a fertile climate for it. In the past, whenever our Nation has bounced back from economic downturns, innovation has been the catalyst. Time and again, inventive ideas have led to new products, generating a wave of job creation and putting us on a path back to prosperity.

This year, I have joined with my colleagues on the Small Business Committee to introduce a full 3-year reauthorization of the SBIR program. As Congress looks for ways to reduce spending yet keep America globally competitive, the SBIR program is that rare piece of legislation that can accomplish both goals simultaneously.

At its most fundamental, the SBIR program provides valuable seed money for entrepreneurs who are willing to

explore untested concepts and, ultimately, develop new products. Additionally, it solves one of the primary concerns facing small businesses today—access to capital. This reauthorization would make important changes to the current program that will allow more entrepreneurs to participate by allowing companies that receive funding from multiple venture capital groups to competitively apply for a portion of SBIR grants.

Reauthorization of SBIR will allow us to continue to foster research and innovation that will translate into a wealth of new employment opportunities and economic growth for western Pennsylvania and all of America. I hope my colleagues will join me in supporting this bipartisan legislation that encourages creativity and ensures America will stay a global leader in innovation for years to come.

HONORING THE LIFE OF FORMER CONGRESSMAN ROBERT B. DUNCAN

The SPEAKER pro tempore. The Chair recognizes the gentleman from Oregon (Mr. BLUMENAUER) for 5 minutes.

Mr. BLUMENAUER. Mr. Speaker, I rise this morning to comment on the passing of a dear friend and Oregon icon, former Congressman Robert Duncan, who died last week at age 90. Bob served his Nation with distinction beginning with his service during World War II in both the merchant marine and the U.S. Navy. After graduating from the University of Michigan Law School, he settled in Medford, Oregon, with his wife Marijane. He was a State legislator from that community. He served two terms as speaker for the first time in Oregon history.

From there, he went to serve in Congress, representing the Fourth Congressional District in southwest Oregon until he was persuaded by President Lyndon Johnson to leave Congress to run for a vacated U.S. Senate seat against Governor Mark Hatfield. In a campaign that defined Oregon politics for over a decade, Bob lost narrowly to Mark Hatfield in, to say the very least, a heated campaign, focusing in large measure over the United States' involvement in the war in Vietnam, which he supported and Mark Hatfield opposed. A significant development was the endorsement of then-Democratic U.S. Senator Wayne Morris of Republican Hatfield, which many experts feel provided the narrow margin of victory for Hatfield. Later, Bob almost won the Democratic primary against Wayne Morse when he ran for reelection 2 years later sending shockwaves that reverberated for a decade.

I first had the opportunity to work with Bob Duncan when I was directing a campaign to lower Oregon's voting age in 1969, and he was a zealous supporter of engaging young people in the political process.

In 1974, Bob again made history by being the first Oregonian to represent 2

different districts in Congress as he was elected to the Third Congressional District, which I am now privileged to represent. He continued for another 6 years of distinguished service, serving on the Appropriations Committee.

After leaving Congress in 1981, Bob returned to private practice as a lawyer in Portland and Washington, D.C., and later served on the Northwest Planning Power Council.

Bob had many passions in his life but none more important than his family. He was married 48 years to Marijane until her death in 1989, and later, he married Kathy Boe and found many years of happiness. Bob had seven children who survive him: Nancy, Angus, David, Jamie, Laurie, Bonnie and Jeanne.

He was by turns a stubborn political animal, generous of spirit, with a legacy for courage strengthened by his convictions. He was a man of great humor, intellect, and conviction. He was also thrifty to an extent that is legendary to family and friends and many of his constituents. Until the end of his life I would still get letters from him with a series of 3-cent stamps and the old congressional return address on the envelope scratched over. But he was very careful with the taxpayer money in his Appropriations Committee to an extent that sometimes drove even his supporters to distraction.

He leaves a legacy for courage, passion for justice, and accomplishment of decades of service, particularly a decade in two very different congressional districts that were united in the admiration of this dedicated public servant. He will be missed, but fondly remembered.

RAPIDLY RISING GAS PRICES

The SPEAKER pro tempore. The Chair recognizes the gentleman from Rhode Island (Mr. LANGEVIN) for 5 minutes.

Mr. LANGEVIN. Mr. Speaker, I rise today to urge my colleagues to join together to immediately address one of the greatest problems facing our families and small business right now; that is, rapidly rising gas prices.

As I traveled across Rhode Island during the district work period, the issue of high gas prices was never far from anyone's mind. It affects every family's bottom line and the budgets of small businesses that are still recovering from the recession.

As our fragile economy continues, it is imperative that we work to find solutions in the short term as we turn our attention towards a serious, long-term solution to reduce our demand for oil. Our Nation simply cannot have low gas prices without reducing the amount of oil that we use.

We remain in constant competition right now with India, China, and other developing Nations, and the world does not have the resources to continue to supply us all with cheap oil, especially

with disruptions in the Middle East that continue to affect production.

I supported the American Clean Energy and Security Act last session because it took steps to immediately reduce demand through improved vehicle fuel economy standards and energy efficient technology in our buildings and homes, while investing in clean energy, including an increased commitment to the research and development of offshore wind.

We should put our money behind those efforts instead of giving billions of dollars in tax breaks each year to oil companies. As we just recently heard, ExxonMobil just reported first quarter earnings of \$11 billion, a nearly 70 percent increase, with other oil companies following closely behind. Mr. Speaker, let's eliminate subsidies for these big corporations that don't need our help.

In the short term, Congress must partner with President Obama and support Attorney General Holder's efforts to monitor oil and gas markets and safeguard consumers against unlawful practices. We also need stricter guidelines for speculators and getting speculators out of the market. We need guidelines for people who buy oil just to sell it at a profit, perhaps by allowing people to buy oil on the market only if they can actually receive product.

Additionally, I urge my colleagues to pressure oil companies to drill on domestic lands where they already have existing leases. The industry right now is drilling on less than a quarter of the 80 million acres where it already has leases approved. While this is not a long-term solution, we need responsible drilling on lands where there are existing leases. Now, this is, I believe, a faster, fairer, and safer path to more domestic production, unlike legislation on the floor this week which will put oil rig workers and the environment at risk by expediting critical safety reviews.

None of this, of course, lessens the urgency of switching to alternative fuels.

□ 1040

The U.S. has only 1.4 percent of the world's proven oil reserves but currently consumes 22 percent of the world's oil.

In the long run, we will remain susceptible to repeats of the current crisis unless we take every opportunity to decrease our dependence on oil. Now I want to highlight one important initiative in my State that involves public transportation. The Rhode Island Public Transit Authority acquired just recently 53 new hybrid buses and is upgrading 10 trolleys to hybrid propulsion, and we should encourage others to follow their lead. RIPTA expects that their new hybrid fleet will save them approximately 20 percent on fuel usage, which will help prevent price increases and route closures.

We should build on the success in Rhode Island nationally by requiring

specific hybrid and fuel efficiency standards for any vehicles involved in Federal grant programs. Complicated problems, like the price of gasoline, often require difficult solutions. But we cannot let this prevent us from moving forward and delivering to our constituents who cannot afford these costs or a slowed economic recovery. Mr. Speaker, I urge my colleagues to work together to enact short-term provisions and long-term solutions to bring relief to working families and small business.

RECESS

The SPEAKER pro tempore. Pursuant to clause 12(a) of rule I, the Chair declares the House in recess until noon today.

Accordingly (at 10 o'clock and 41 minutes a.m.), the House stood in recess until noon.

□ 1200

AFTER RECESS

The recess having expired, the House was called to order by the Speaker at noon.

PRAYER

Reverend Dr. Kurt Gerhard, St. Patrick's Episcopal Church, Washington, D.C., offered the following prayer:

God of peace, Who called all people from every nation to seek reconciliation with each other for the good of creation, inspire in us the will to persevere, through moments of conflict, to seek common ground.

Bless this country and all its leaders in the continued fulfillment of a vision set forth in July of 1776 that all people are "endowed by their Creator with certain unalienable rights, that among these are life, liberty and the pursuit of happiness."

During this session of the 112th Congress in this, the people's House, may the hearts of these duly elected Representatives be blessed with the integrity of purpose and the steadfast commitment to seek and serve the people of the United States of America for the betterment of this country and the world.

We ask this all in the name of the one God, the God of all nations. Amen.

THE JOURNAL

The SPEAKER. The Chair has examined the Journal of the last day's proceedings and announces to the House his approval thereof.

Pursuant to clause 1, rule I, the Journal stands approved.

PLEDGE OF ALLEGIANCE

The SPEAKER. Will the gentleman from Ohio (Mr. JOHNSON) come forward and lead the House in the Pledge of Allegiance.

Mr. JOHNSON of Ohio led the Pledge of Allegiance as follows:

I pledge allegiance to the Flag of the United States of America, and to the Republic for which it stands, one nation under God, indivisible, with liberty and justice for all.

ANNOUNCEMENT BY THE SPEAKER

The SPEAKER. The Chair will entertain up to 15 requests for 1-minute speeches from each side of the aisle.

GAS PRICES

(Mr. JOHNSON of Ohio asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. JOHNSON of Ohio. Mr. Speaker, the average for a gallon of gas in Ohio is over \$4 a gallon. In eastern and southeast Ohio, this is particularly hard on families who live in rural areas. Farmers, ranchers, seniors, working families who have limited means of transportation—these high gas prices are having a negative impact on everyone. The higher gas prices go, the more of an impact it has on our economy and on our chances for a real economic recovery.

Small business owners are watching money they could otherwise invest in their businesses go to paying for fuel, and working families are anxiously redoing their budgets to account for higher fuel costs and looking for ways to cut back.

We're blessed with an abundance of natural resources in Ohio. We're one of the highest coal-producing areas, and with the Marcellus shale right next door in West Virginia, we're poised to make an enormous contribution to making America self-sufficient in energy. We need an energy strategy that will help us become energy self-sufficient so we stop relying on other countries to meet our energy needs.

Now is the time to levy a "permatorium" on developing American energy resources. Let's open up our American resources and put our country on the path to ensuring our energy security, instead of continuing to rely on foreign sources for energy.

WE MUST NOT PASS H.R. 3

(Mr. QUIGLEY asked and was given permission to address the House for 1 minute.)

Mr. QUIGLEY. Madam Speaker, I rise today in opposition to H.R. 3 and to remind my colleagues of two key dates.

January 20, 2011, the day H.R. 3 was introduced. Just 3 months ago, the authors of this extremist, offensive bill introduced a version of H.R. 3 that would have redefined rape and incest. They don't want us to remember, but we cannot forget 173 Members of Congress signed their names to a bill that would have redefined rape to exclude women who are unconscious, mentally disabled, or forced into sex by threat.
